Frameworks/Platforms: Flutter, Firebase, Next.js, Node.js

APIs & Integrations: OpenAI, VAPI, Salesforce, GoHighLevel, Intercom, Slack API, REST APIs, Webhooks

EXPERIENCE

AI Automation Engineer | RobustCraft

June 2025 – Present

- Worked as augmented staff for a Swiss fintech client, building AI automation systems and backend integrations.
- Designed and deployed 20+ production automation workflows for sales and marketing, including lead enrichment, AI-driven lead scoring, regional assignment logic, CRM sync, and team notifications.
- Built an AI voice calling agent for outbound sales with regional caller ID, CRM-driven conversation personalization, voicemail retry logic, and post-call analysis.
- Architected a 13-workflow, 350+ node multi-agent social media automation system with AI content generation across multiple platforms, image generation, and brand guideline enforcement.
- Engineered a real-time bidirectional sync between two CRM instances with bulk migration, webhook-driven live sync, loop prevention, custom-field mapping, and calendar sync.
- Developed an automated cold email outreach system with AI-generated sequences, reply detection, and sentiment analysis.
- Built custom tracking scripts for landing pages with scroll, video, and CTA behavior capture via webhooks.
- Set up an AI customer support chatbot with knowledge base authoring and CRM sync. Deployed multilingual landing pages across four languages.

Marketing Lead | Indexx.ai

February 2025 – June 2025

- Spearheaded marketing strategy and execution for Indexx.ai, a blockchain-based fintech platform.
- Led user acquisition campaigns, content strategy, and brand positioning across digital platforms.
- Collaborated closely with product and design teams to align marketing initiatives with platform development.
- Utilized data-driven insights to optimize campaign performance and drive community engagement.
- Played a key role in crafting messaging, token promotion strategies, and partnership announcements.

Lead Game Developer | PROJECT AT NEWTON HEWITT & Co/SHAPER.US

October 2024 - December 2024

- Led a team to build an MVP for an office-themed multiplayer game in Unreal Engine 5.
- Handled code refinement, UX improvements, quality assurance, and gamification design.

PROJECTS

Corporate Espionage | Unreal Engine 5, EOS | Project at Newton Hewitt & Co/Shaper.US

- Collaborated on a corporate espionage-themed multiplayer game developed in Unreal Engine 5.
- Designed and implemented the game loop, task assignment and role assignment systems.
- Integrated multiplayer synchronization and online features, including lobby management using Epic Online Services.

Google Scrapper | Flutter, web Scraping | Paid Project

- Developed a google news web scraper with a responsive front end using Flutter and Material-UI.
- Designed an efficient scraping method that allowed the user to scrape data in any language and show the final product in the English language regardless of their region.
